**Drive towards sustainability by  
providing Green Packaging solutions**

## About Us

Vishal Containers Ltd is a global packaging manufacturer and supplier to varied industries. It was established in the year 1985 in Gandhinagar, India to meet the needs of packaging materials by manufacturing corrugated boxes, offset printed folding cartons, and flexible packaging. We have invested in top infrastructure with dedicated plants for each packaging product along with plant to manufacture Green Sustainable Recycle Ready flexible packaging.

We began identifying a growing demand for green packaging in flexible packaging as well, due to mounting waste problems. Additionally, several brand owners began committing to sustainable packaging, which became a motivating factor for us. To develop sustainable packaging, we invested in electron beam printing technology and barrier coating technology to meet the circular economy goals.

Our packaging business assists global and regional clients to achieve high-quality packaging across markets with a variety of products and services. Vishal Containers Ltd is a one-stop-solution provider for any requirements of packaging for industries like agriculture, food & beverages, building and construction, home & personal care, pharmaceutical, pet care and retail and e-commerce.

Our main goal is to provide total packaging solutions under one roof, with a commitment to safeguarding food, people, and the environment, as well as promoting global wellbeing and convenience.

## Why Us

- ✓ 4, 00,000 sq ft. large manufacturing facilities
- ✓ Advanced EB Technology and Barrier Coatings for Flexible Packaging
- ✓ Custom packaging solutions tailored to your exact specifications
- ✓ Market-driven solutions that have been optimized over 35+ years of technical expertise
- ✓ Corrugated box – ISO/SEDEX & Flexible packaging – FSSC22000/BRC/ SQF Certified Company
- ✓ We are committed to a greener future, our packaging design resonates with shoppers and our service level stands out to brand owners.

## Infrastructure

Vishal Containers Ltd has 3 manufacturing units located near Ahmedabad. These production facilities are outfitted with cutting-edge machinery and overseen by qualified personnel. Well equipped QC Labs that assure that the products provided to clients are of the highest quality. Vishal Containers has an installed capacity of 15,000 Tons of flexible laminate per annum and 36,000 Tons of corrugated boxes per annum.

By applying state-of-the-art technology and fully automated computerized control systems, we are capable of providing the best international quality of packaging materials in various sizes and specifications. Our machinery allows us to offer a wide range of multi-coloured and multi-dimensional printing and packaging services.

## Quality Assurance

Our Quality Control Department is fully equipped to meet even the strictest client specifications. Our lab is well equipped with all of the necessary testing equipment for corrugated cartons, flexible laminates and pouches and folding cartons. Raw materials and finished goods are inspected with reports to ensure that they meet the needed quality standards.

# Flexible Packaging

Packaging that is environmentally friendly has become a big topic. Flexible packaging has a lower overall environmental impact than most other types of packaging, but it has the disadvantage of being difficult to recycle. Consumers are more worried than ever about a package's end-of-life situation. Flexible packaging made entirely of 100% polyethylene (PE) is a win-win-win situation for the environment, consumers, and companies.

Vishal Containers Ltd offers a variety of recyclable mono material and regular laminate structures of flexible packaging materials, ranging from roll stock to preformed pouches.

Vishal Containers Ltd developed the sustainable circular flexible packaging range under CIRCUPACK made of Mono Material films, a combination of Electron Beam & Barrier Coating Technology. Developing recyclable and circular flexible packaging materials now has become our vision, to meet that we have invested in the Electron Beam Printing Technology and Barrier Coating technologies. EB technology is core to our development of recyclable or sustainable packaging structures in flexible packaging. Barrier properties in flexible packaging play's important role in keeping food fresh during its shelf life and we have invested substantially to get right barriers on Recyclable Mono Materials.

## Film Types

- ✓ PET
- ✓ PE
- ✓ BOPP
- ✓ METALISED

## Product we offer

- ✓ Roll Stock
- ✓ Premade Pouches

## Printing Technology

- ✓ Rotogravure Printing
- ✓ EB Flexo

## Pouching Format

<p>Three Side Seal Pouch</p> 	<p>Pillow Pouches</p> 	<p>Bottom Gusset Pouch</p> 	<p>Spouted Pouches</p>
